## VUT Road to 60 campaign

The VUT Road to 60 campaign is an exciting initiative leading up to the university's diamond jubilee in June 2026. Running from August 2025 to June 2026, the campaign is designed to:

- Celebrate VUT's 60th anniversary by honouring its history and legacy.
- Strengthen institutional pride and identity among staff, students, alumni, and external stakeholders.
- Mobilise resources and partnerships to support the university's long-term sustainability and growth.
- Enhance VUT's reputation and visibility locally, nationally, and internationally.

The campaign includes a series of activations, events, and communications across the university, such as alumni engagement, donor mobilisation, student and staff activations, and outreach to external stakeholders. It is not only a commemorative activity but also a strategic positioning platform that aligns VUT's brand with its long-term ambitions.

### CAMPAIGN LOGO

### FLOW OF LEGACY 1966–2026

Designed by Ms Lerato Makhetha, a student in the Department of Visual Arts and Design, this emblem celebrates 60 years of strength, unity, and purpose at the Vaal University of Technology. The '6' and 'o' are seamlessly connected by a ribbon, symbolising an institution that has stood firm and connected for six decades. Incorporating the VUT shield, the four lines complement the original logo. The ribbon, inspired by the Vaal River, flows from the 'o' to the base of the '6', representing a gateway to the future. The design captures VUT's forward-looking vision while honouring its enduring legacy.

Join us as we celebrate the university's past, present, and future.

# **TO THE CLASS OF 2025**

***Esteemed Graduates, Distinguished Guests, Faculty Members, Families, and Friends***

Today we gather in the spirit of Spring, a season of renewal, to celebrate the remarkable achievements of the Class of 2025. This day is not only a recognition of your dedication and perseverance, it is a call to rise and play your part in shaping the future.

South Africa continues to face complex challenges. Unemployment remains stubbornly high, poverty persists, and inequality continues to test our collective resolve. These realities cannot be ignored. Yet they are not immovable. They are waiting for innovators, leaders and visionaries, people like you, to bring forth solutions that transform hardship into opportunity.

At the Vaal University of Technology (VUT), you have been equipped with more than academic knowledge. You have gained resilience, sharpened your critical thinking, and embraced collaboration. These are the tools that empower you to create employment, to build enterprises, to lead with integrity, and to contribute meaningfully to society.

As we approach VUT's **Diamond Jubilee in June 2026**, celebrating sixty years of academic excellence and innovation, you carry forward a proud legacy. The Road to 60 campaign is not just about commemorating our past, it is about charting a bold path into the future. You, our graduates, will be the living testament to this legacy. Your contributions in industry, research, and community development will give substance to the promise of the next sixty years.

This season reminds us that every ending is also a new beginning. Like Spring itself, your journey is a renewal: of dreams, of purpose, of hope. The knowledge you have gained is not a finished story, but a seed. And seeds demand to be planted, nurtured, and allowed to bloom into something greater than themselves.

As you step beyond these gates, I challenge you to:

- **Be Builders of Legacy:** As VUT approaches sixty years, carry its story forward by writing new chapters of excellence and innovation.
- **Be Voices of Courage:** In a world clouded by uncertainty, speak with clarity, truth, and conviction.
- **Be Stewards of Possibility:** Create spaces where others may grow, where communities may thrive, and where progress becomes inevitable.

Do not measure your success only in what you achieve, but also in how many lives you touch, how many doors you open, and how many futures you help shape.

Today, you join the long line of VUT graduates who have carried our institution's values into the world. Tomorrow, you will be remembered not just for what you became, but for what you enabled others to become.

Graduates of Spring 2025: this is your season. Step forward with the energy of renewal, the pride of sixty years behind you, and the vision of a brighter tomorrow ahead.

Congratulations. The world is ready for you.

I thank you.

**THESIS: RECLAIMING LIBERATION STRUGGLE MEMORIES IN A POST-APARTHEID SOUTH AFRICA IN THE SEDIBENG DISTRICT MUNICIPALITY THROUGH SHORT ANIMATED FILMS**

**PROMOTER:** Prof Allan Munro

**CO-PROMOTER:** Prof Anthony Ambala

### **ABSTRACT:**

Mashaole Makwela in his PhD research project title: 'Reclaiming liberation struggle memories in a post-apartheid South Africa in the Sedibeng District Municipality through short animated films' explored the specific dynamics and tensions at play, as well as the types of choices that need to be made, when developing a short-animated film based on a specific historical event such as the Boipatong Massacre. The candidate developed the practice-led research methodologies required for the study, along with the theoretical frameworks relevant to writing history in both written and visual forms (5 minutes short animation film was made titled "Body of massacre" (2023) based on the 17 June 1992 Boipatong Massacre). Central to this were the contributions of Rosenstone on 'true inventions' and 'false inventions'. The research findings suggest that four major continua guide the artist/researcher's decision-making process. a) concerns the factual accuracy of the event and the memories of the participants. b) involves Rosenstone's concepts of true and false inventions. As an animated film is not a non-fiction, the demands of the medium must be considered. c) addresses the specific demands of animation, particularly balancing visual 'accuracy' with 'fantasy' elements. d) concerns the competencies and purposes of the artist and the accessibility of the necessary animation technologies. These four continua create a framework for decision-making when transforming history into an animation film.
