VUT Road to 60 campaign

The VUT Road to 60 campaign is an exciting initiative leading up to the university's diamond jubilee in June 2026. Running from August 2025 to June 2026, the campaign is designed to:

- Celebrate VUT's 60th anniversary by honouring its history and legacy.
- Strengthen institutional pride and identity among staff, students, alumni, and external stakeholders.
- Mobilise resources and partnerships to support the university's long-term sustainability and growth.
- Enhance VUT's reputation and visibility locally, nationally, and internationally.

The campaign includes a series of activations, events, and communications across the university, such as alumni engagement, donor mobilisation, student and staff activations, and outreach to external stakeholders. It is not only a commemorative activity but also a strategic positioning platform that aligns VUT's brand with its long-term ambitions.

CAMPAIGN LOGO

FLOW OF LEGACY 1966–2026

Designed by Ms Lerato Makhetha, a student in the Department of Visual Arts and Design, this emblem celebrates 60 years of strength, unity, and purpose at the Vaal University of Technology. The '6' and '0' are seamlessly connected by a ribbon, symbolising an institution that has stood firm and connected for six decades. Incorporating the VUT shield, the four lines complement the original logo. The ribbon, inspired by the Vaal River, flows from the '0' to the base of the '6', representing a gateway to the future. The design captures VUT's forward-looking vision while honouring its enduring legacy.

Join us as we celebrate the university's past, present, and future.

MESSAGE TO THE CLASS OF 2026

Esteemed Graduates, Distinguished Guests, Faculty Members, Families, and Friends

Today we gather not only to celebrate an academic milestone, but to honour a journey of perseverance, discipline and hope. Graduation is never merely the conclusion of study. It is the beginning of responsibility. It is the moment when knowledge meets the world and must prove its worth.

To the Class of 2026, you arrive at this stage at a defining moment in the history of the Vaal University of Technology (VUT). In June 2026 the University celebrates its Diamond Jubilee, marking sixty years of academic excellence, innovation and service to society. Your cohort therefore holds a special place in this historic journey. You are the Jubilee graduates, the generation that steps forward as the University marks six decades of shaping talent and transforming lives.

Across those six decades, thousands have walked these halls before you. Engineers who designed bridges and factories. Technologists who powered industries. Educators, entrepreneurs and innovators who shaped communities across South Africa and beyond. Today you

join that lineage. You become part of the living legacy of the University.

Your achievement is not yours alone. Behind every graduate stands a constellation of support. Parents who sacrificed. Families who encouraged. Lecturers who guided and challenged. Friends who walked the journey with you. Today we honour them as well, because their belief helped carry you to this moment.

Yet graduation does not take place in isolation from the realities of the world around us. South Africa continues to face profound challenges. Unemployment remains high. Poverty still shadows many communities. Inequality continues to test the promise of our democracy. These are not abstract statistics. They are lived realities that call for courage, innovation and leadership.

But history teaches us that societies are changed not only by policies and institutions. They are changed by people who refuse to accept that things must remain as they are.

At VUT, you were prepared for precisely such a moment. You were trained not simply to memorise knowledge but to apply it. To question. To design. To build. To solve problems that matter. Whether you enter laboratories, boardrooms, classrooms, factories or start your own enterprises, the education you received here equips you to turn ideas into impact.

The world you enter is one of profound transformation. Technology is reshaping industries. Artificial intelligence is redefining the nature of work. Sustainability and responsible innovation are becoming central to the future of our planet. In such a world, your qualifications are not merely credentials. They are instruments of change.

As the University walks the Road to 60, we reflect not only on where we have come from, but on where we must go. A Jubilee is not simply a celebration of years passed. It is a moment of renewal, a reaffirmation of purpose. For VUT, that purpose remains clear: to produce graduates who are builders of society, creators of opportunity, and custodians of ethical leadership.

You, the Class of 2026, embody that mission. You are the engineers who will design smarter cities and resilient infrastructure. You are the technologists who will build the industries of the future.

You are the innovators who will create businesses that generate employment.

You are the thinkers who will challenge complacency and inspire progress.

In years to come, when the history of this Diamond Jubilee is told, your generation will be remembered as the graduates who stepped forward at a decisive moment. The generation that carried sixty years of legacy and transformed it into possibility.

So walk into the world with confidence. Let curiosity guide you. Let integrity define you. Let service to society remain your compass.

May you build boldly.

May you lead with courage.

And may the knowledge you carry from this University illuminate the path ahead.

Congratulations, Class of 2026.

The future now calls your name.

The role of alumni relations in any institution is to manage the relationship between an institution and all its former students and graduates. VUT, like other institutions, is committed to enhance its relationship with its former students and graduates through formal and informal programs that are mutually beneficial in nature.

Each year we strive to reconnect more former students and graduates with the current students in their respective groups of interests and academic fields that helped them most in their careers / extramural activities. We affirm all segmented Networks; be it the Vaal College for Technical Advancement, Vaal Triangle Technikon or Vaal University of Technology indiscriminately.

We would like to invite all former students and graduates to share their success stories, job opportunities, career milestones, internships, bursaries, challenges faced and mostly inputs on the current development(s) of the university. With your participation, we support VUT in its endeavors to make sustainable impact in the immediate community and the broader society. On a collaborative effort with diverse stakeholders, Convocation

& Alumni Association, students and friends of VUT, we continue to promote the VUT brand through improved marketing and communications, meaningful alumni engagements guided by the Vaal University of Technology's 2033+ Strategy.

Like a unique puzzle piece, you are an ambassador of VUT, your participation to attract and hold interests of Alumni is valued.

Welcome..., you are a now part of VUT Alumni Network; more than 100k VUT graduates since its inception in 1966.

Welcome to a variety of interest groups and networking chapters; regionally, provincially, nationally and internationally. Check us on social media and meet your peers, former Ma-Vallies / MaVuti (classmates, Res mates, Sports mates, mentors, Lecturers, etc.)

Your meaningful participation or engagement is appreciated. Thank you for choosing VUT.
